

## Softbox 435

COMPACT SYSTEM FOR ROMAN BLINDS WITH CHAIN-PULL ACTION IDEAL FOR HOME OR OFFICE APPLICATIONS

The winding mechanism is contained inside the «esthetic» aluminium box.

Raising takes place by means of wire winders driven by a clutch mechanism worked by a chain-pull that determines the position of the blind.

The wire winders are equipped with a release mechanism for quick removal, cleaning and refitting of the blind.

Ceiling or wall mounted by means of extending brackets.
