

Starbox - 4160

BOXED ROLLER BLIND OPERATED BY MOTOR 230VAC WITH M2NET RF RADIO RECEIVER ON BOARD

STARBOX 4160 is a motorized roller system (for black out or dim out blinds, either applicable for indoor and outdoor). It is optimal for sun protection of verandas, pergolas and winter gardens able to create a cool atmosphere in summer and, inside the home environment, a warm winter atmosphere.

STARBOX 4160 is driven by a 230 Vac tubular motor, "three-wires" connection and "dry contacts" that can be hardwired to a switch or to an automation system.

STARBOX 4160 carries the windproof certificate EN 13561: 2015 for outdoor installations. Maximum system dimensions: 300 x 400 cm.
