

Certificated fabrics

Mottura ищет решения, соответствующие требованиям охраны окружающей среды

Mottura does not skimp when searching for appropriate solutions to the demand for ecological sustainability, with fabrics that are PVC-FREE, recyclable and without substances that are dangerous to humans or nature.

The result is Mottura ecological fabrics, technical fabrics that can improve sunlight management while helping to protect the environment.

Ecological fabrics by Mottura. High fashion, high tech, high savings.

GREENGUARD Indoor Air Quality Certification Program certifies that products will respect rigid limits of indoor chemical emissions in the air.

GREENGUARD Children & School Certification Program is even a stricter certification which protects the particular sensitivity of infants and children who attend kindergartens and schools.

OEKO-TEX 100 Standard certification guarantees that textile products do not contain dangerous substances for health.

MICROBAN Is a worldwide recognised branch. It guarantees a permanent anti-microbial protection.
