

# LINEA

Una caratteristica della lamella in legno è che, talvolta, il colore può essere leggermente diverso da quello presente nella cartella colori e, pertanto possono evidenziarsi venature del legno | A characteristic of the woodenslat is that its color may sometimes differ slightly from that seen on the color chart, and therefore grain may show. | Les lamelles peuvent avoir une couleur légèrement différente de celle de l'échantillon et présenter des veines. C'est une caractéristique propre aux lamelles en bois. | Een eigenschap van houten lamellen is dat de kleur soms licht afwijkt van deze getoond op de kleurkaart, en dat de houtstructuur zichtbaar kan zijn.
